- **1. Recent solar activity**
- **2. Super-human physics**
- **3. Sacred Geometry**
- **4. The three requirements and demands**

Congratulations! you are all still here

We are in a Solar Maximum of Coronal Mass Ejections (CME's) Direct hit, extreme explosive sunspot group Oct. 5-9 also Oct. 10-11

Suns poles shift every 11 years allowing new vitality to pour into our system. DK also says this about our own planetary magnetic shift which is now occurring and which will allows cosmic forces to pour through unimpeded.

3 Aspects of our solar logos, the sun (Etheric, Heart and Will)

Geomagnetic Storms

Usually these ropes of charged plasma collapse back onto the surface of the sun — but sometimes they snap, slingshotting charged particles out into the solar system.

As these charged particles move through the Earth's magnetic field, they can create a geomagnetic storm, in which electromagnetic disturbances propagate across the sky and surface of a planet.

More Solar Storms coming

With the current period of high activity, scientists predict “at least a few more G4 events between now and 2025,” But the elevated risk of solar storms could last into 2026, because some evidence suggests CMEs may become more common on the back side of the peak in solar activity.

A geomagnetic storm (G-3) that sparked auroras as far south as Arizona and Texas on Oct. 7th and 8th is finally over. Earth has exited the CME's magnetized tail. If you missed the show, good news: More auroras are in the offing. The sun just launched another CME directly toward Earth.

The Current Opportunity

“The moment of opportunity which is upon us. (1942) This is the result of certain astronomical happenings, such as the pouring in of energy from a new sign in the Zodiac, and the shift of the earth's pole.” (Esoteric Psychology 2, 708)

Cosmic forces coming from outside our Solar System

As we just mentioned Our Solar Logos is being impacted by cosmic forces coming from outside of our Solar System that is having a radioactive effect on all of the planetary Logoi and their multiplicity of lives, be it humanity, the lower kingdoms, the various elemental, devic and angelic groups or Shamballa and the Hierarchy of Masters.

2025 and the impact of Divine Will

- The science of the soul in its various aspects (mental, psychical, and spiritual) is making much headway now in the world, and is absorbing more and more the attention of thinkers. This is the result of certain waves of energy impinging upon our solar system and thus eventually finding their way to our planet. (Treatise in Cosmic Fire, P. 1256)
- The four the most important star systems, or constellations, filtering through our own Solar Logos at this time and given by DK that have a direct influence on our planetary life and all the kingdoms of nature at this time are:
 - **Ray 1. Great Bear (Ursa Major)**
 - **Ray 2. Sirius**
 - **Ray 3. Pleiades**
 - **Ray 7. Draco**
 - DK further states:
 - “To these would be added other streams of energy which definitely play upon and affect our planetary life, such as those coming from that great star, **Betelgeuse, or from Antares** and other stupendous suns and solar systems... (EP 2 15-16)
- Although all these cosmic influences distribute different ray qualities, they all, in their higher expressions, embody some aspect of Divine Will, or what DK has also designated as “the Principal of Directed Purpose.” A principal that working through the 7th ray at this time historically synthesizes all of the 7 ray qualities into something totally new and unknown into our solar system as well as our lesser planetary and human systems.

- Betlegeuse and Supernovas

- Supernovas and ultraviolet light

Bring within our range of contact the infra-red and ultra-violet colours

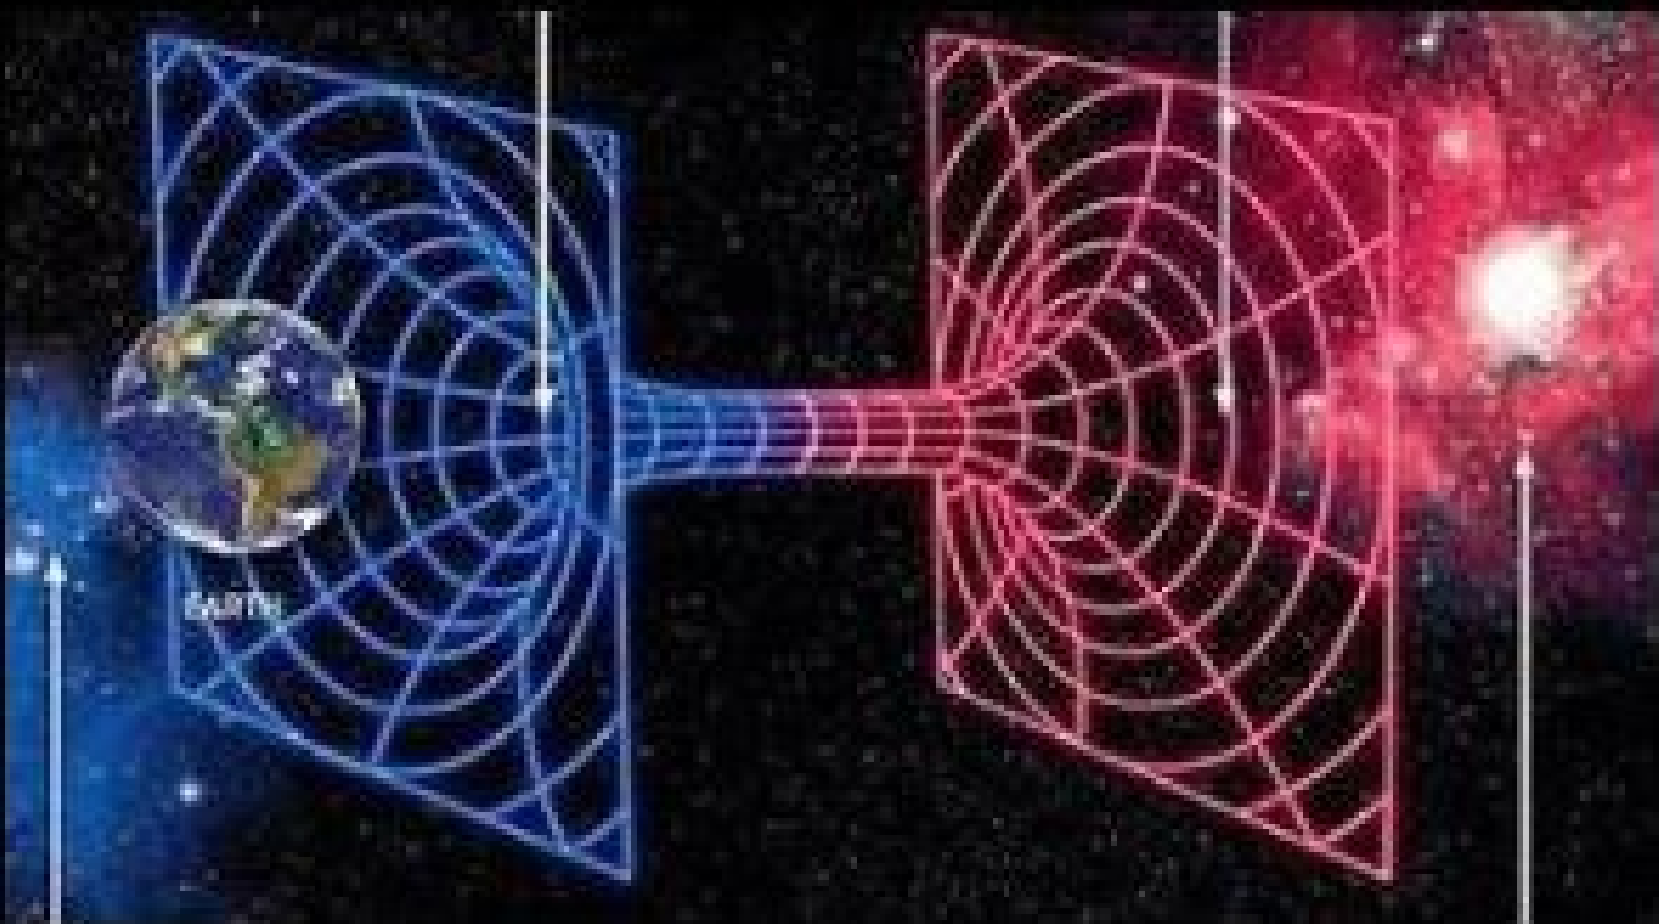

- “In speaking about the increased radiance of light seeping in from the etheric and astral planes DK has this to say: "The light from the astral plane (a starry radiance) and the light of the planet itself will be more closely blended, and the result upon humanity and upon the three other kingdoms in nature cannot be over-emphasized... **It will bring within the radius of our range of contact the infra-red and ultra-violet gamut of colours...**" (EP 1, 103-4)

THE SEVEN GREAT BREATHES

of the 2nd Ray Solar Logos

The Spirit or monad on his own plane sounds forth the note (his hierarchical note) and descends into incarnation. It is both [Page 57] the note of attraction and of out-breathing. The personality—the reflection of that monad at the densest point in evolution,—is linked to the monad by the attractive force of the Sacred Word sounded by its monad on its note and on its own subtone... When the Personality finds for itself (after lives of stress and search) its spiritual note with the right key and subtone, what is the result? It accords with its monadic note, it vibrates to the same measure, it pulsates with the same colour, the line of least resistance is at last found, and the indwelling life is liberated and. returns to its own plane. (LOM 57-58)

Super—Human Physics

In this next video we see recent discoveries on quantum levels which illustrates conventional science is slowly catching up and just beginning to see that higher etheric energies can be trapped and manipulated for the potential of unlimited energy.

The Star of Life, the Dual Tetrahedron

(The rule of the square must end)

“My problem has been to choose which of the myriad interlocking triangular relationships I would take up with you and thus present this science in such a manner that it would prove of real interest. The inner web of light which is called the etheric body of the planet is essentially a web of triangles and when the evolutionary process is completed, it will have been organised. At present a pattern of squares is the major construction of the web but this is slowly changing as the divine plan works out. The etheric webs of the sacred planets are largely triangles whilst that of the Sun is that of interlaced circles. The effort on Earth today (as seen by the planetary Logos) is to bring about a transformation of the web of the planet and thus slowly change the existing squares into triangles. This is done by the creation of division, by the application of the Law of Separation, but also by the recognition, in consciousness, of duality, the application of directed motion and the appearance of two triangles in the place of one square. When this has taken place, the perceiving consciousness recognises identity and the rule of the square is ended. These words were once spoken to me by an ancient seer who bisected the square esoterically, thus forming two triangles and united them in a fresh manifestation to form a Star of Life. Ponder on this.” (EA 480)

The 10 tetractys

The tetractys (Greek: τετρακτύς), or tetrad, or the tetractys of the decad is a triangular figure consisting of ten points arranged in four rows: one, two, three, and four points in each row, In terms of the Pythagorean Tetractys, reaching from unity through duality to trinity and quaternity.

The 10 Tetractys

“...He (*a Master*) and I can accept you, but until your Higher Ego, with the light on the Higher SELF on it does (*accepts you*), the first Triangle will never become a complete Tetraktis....”

- HPB private letter to A.B. and I.C.

Section 3

The 3 notes and the 3 demands

“What I am doing in these instructions is to indicate the relation between the threefold personality and the Spiritual Triad, linked and brought together by the antahkarana. Each of these three lower aspects has its own note and it is these notes which produce the sounding forth of the three demands which evoke response from the Spiritual Triad and thus reach the Monad in its high place of waiting in Shamballa.” (RI p62)

MONAD

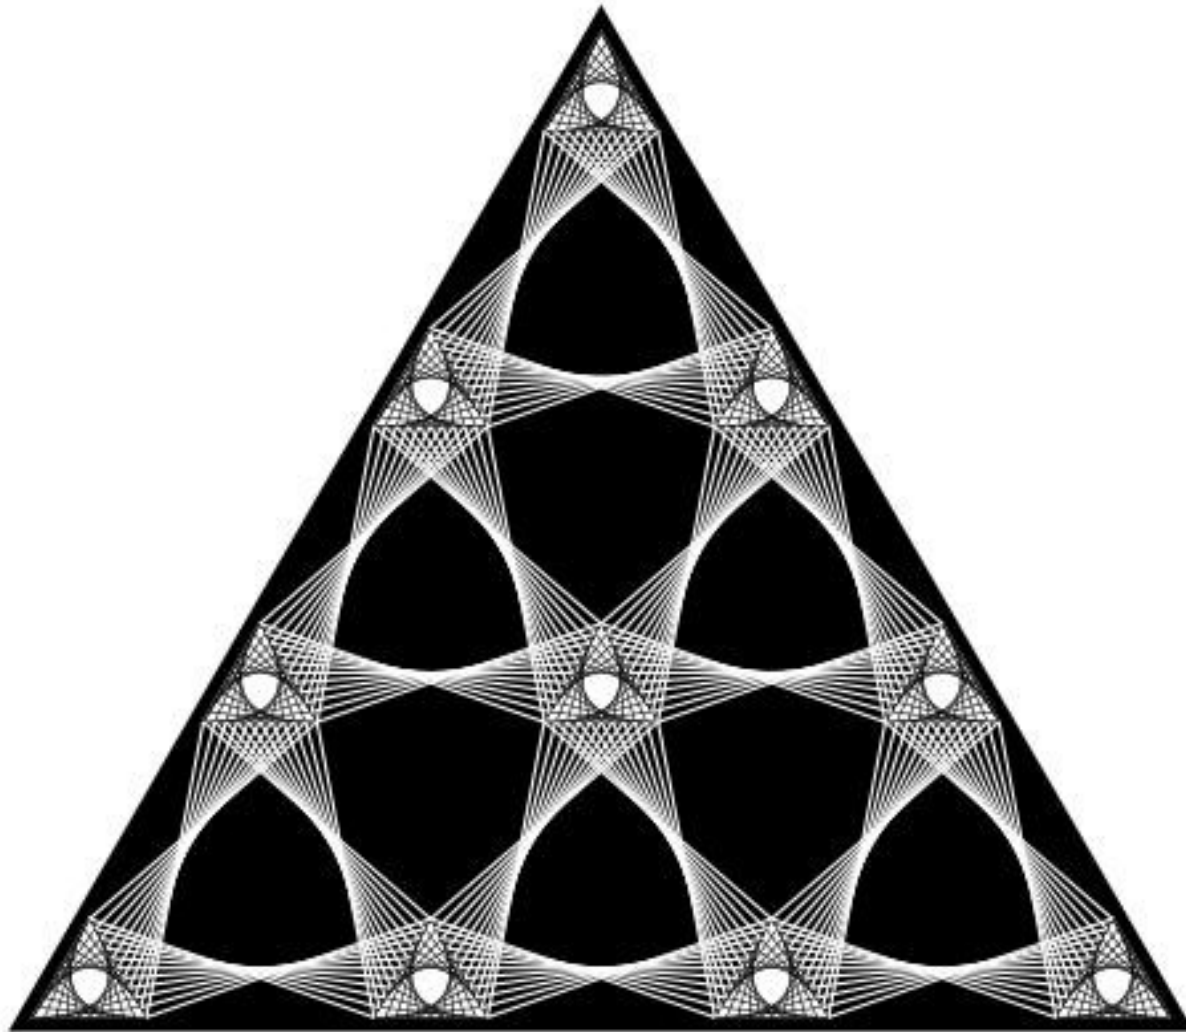

The Triple Call

"Triple the call must be, and long it takes to sound it forth. Let the disciple sound the cry across the desert, over the sea, and through the fires which separate him from the veiled and hidden door. Under this symbology comes to the disciple the injunction to make the desert of the physical plane life to blossom like the rose, so that from the garden of the lower life may arise those sounds and scents, and a vibration strong enough to cross the intervening space between it and the portal; to still the restless waters of the emotional life, so that in their limpid, still expanse, that portal may be reflected, and the lower life mirror forth the spiritual life of the indwelling divinity; to pass through the fiery furnace those motives, words, and thoughts which are the mainspring of activity, and have their origin upon the mental plane. When these three aspects of the manifesting Ego, the God within, are brought under control, co-ordinated, and utilised, then, even unconsciously to himself, will the voice of the disciple be heard, demanding the opening of the door. When the lower life upon the physical plane is fertilised, the emotional stabilised, and the mental transmuted, then naught can prevent the latch upon that door being lifted, and the disciple passing through. Only synchronous vibration to that which lies the other side of the door produces its opening, and when the key of the disciple's life is attuning itself to that of the hierarchical life, then, one by one, the doors will open, and nothing can keep them closed...
