Loose grid of squares

This grid is open and vulnerable to the entry of negative and undesirable forces.

By drawing lines of lighted substance diagonally across these open squares evil is sealed from entry.

Perfect health and integration on a planetary, or on an individual level, is the result of uniformity and strength of the entire etheric body.

Tight grid of triangles

This is a simulated grid of an electric field. This sphere has 9,823 points and 29,463 links in its triangle mesh.

It is impervious to outside forces and can only be destroyed by the light within.

STANZA XXXIX (From Archaic Formulas. No. 49)

PATH III. Training for Planetary Logoi.

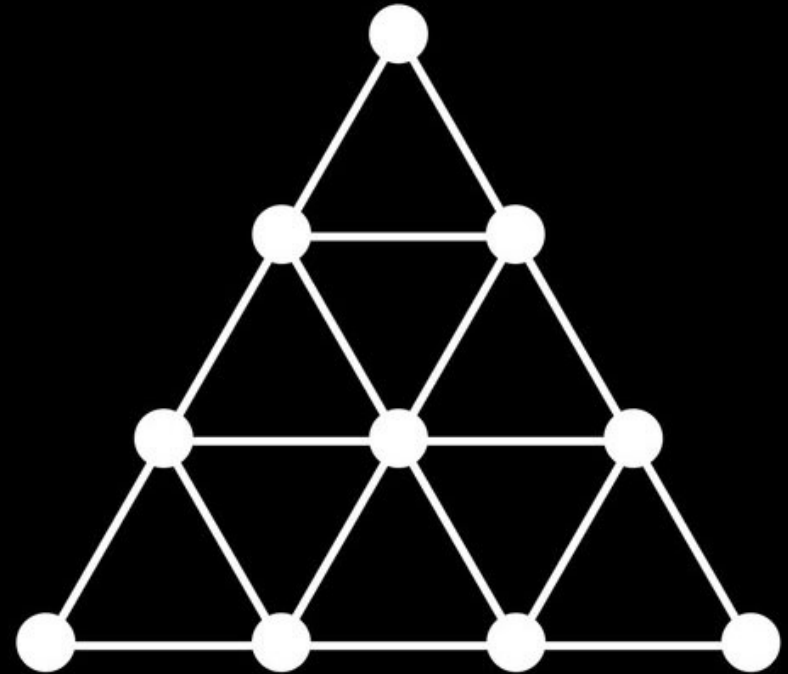

“One group is called the “Lotus Lords of deep unseeing sleep.” They dream, and as Their dreams take form, the worlds speed on.

The great and cruel maya of the planes of sweet illusion comes into being, draws into its snare the points of unconnected light, and dims their lustre.”

(TCF p. 1272)

The 10 tetractys

The tetractys (Greek: τετρακτύς), or tetrad, or the tetractys of the decad is a triangular figure consisting of ten points arranged in four rows: one, two, three, and four points in each row, In terms of the Pythagorean Tetractys, reaching from unity through duality to trinity and quaternity.

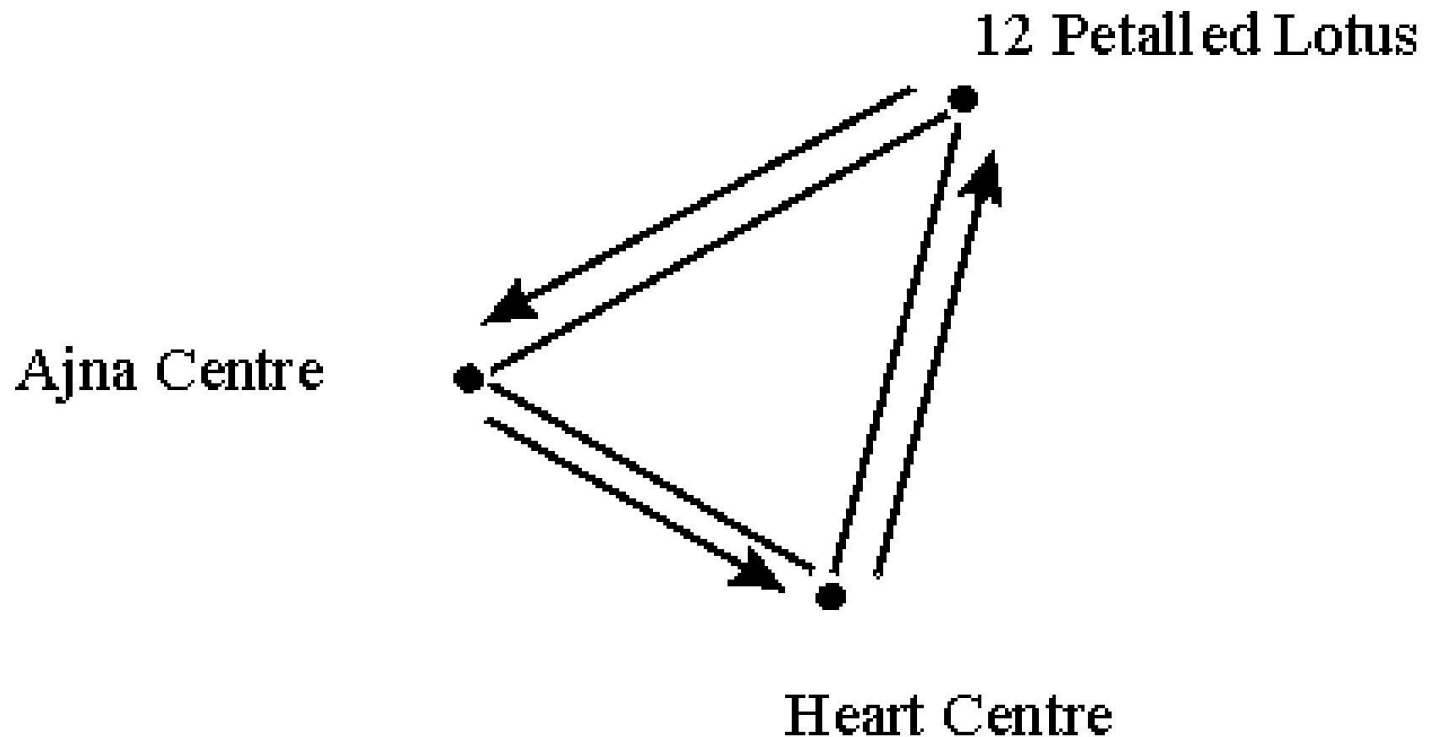

The 10 Tetractys

“...He (*a Master*) and I can accept you, but until your Higher Ego, with the light on the Higher SELF on it does (*accepts you*), the first Triangle will never become a complete Tetraktis....”

- HPB private letter to A.B. and I.C.

**This is also the first esoteric triangle of energy
which the disciple creates. (DINA 2 183)**

This is in reality more in the nature of a funnel of reception than a triangle.

Pranic Triangles

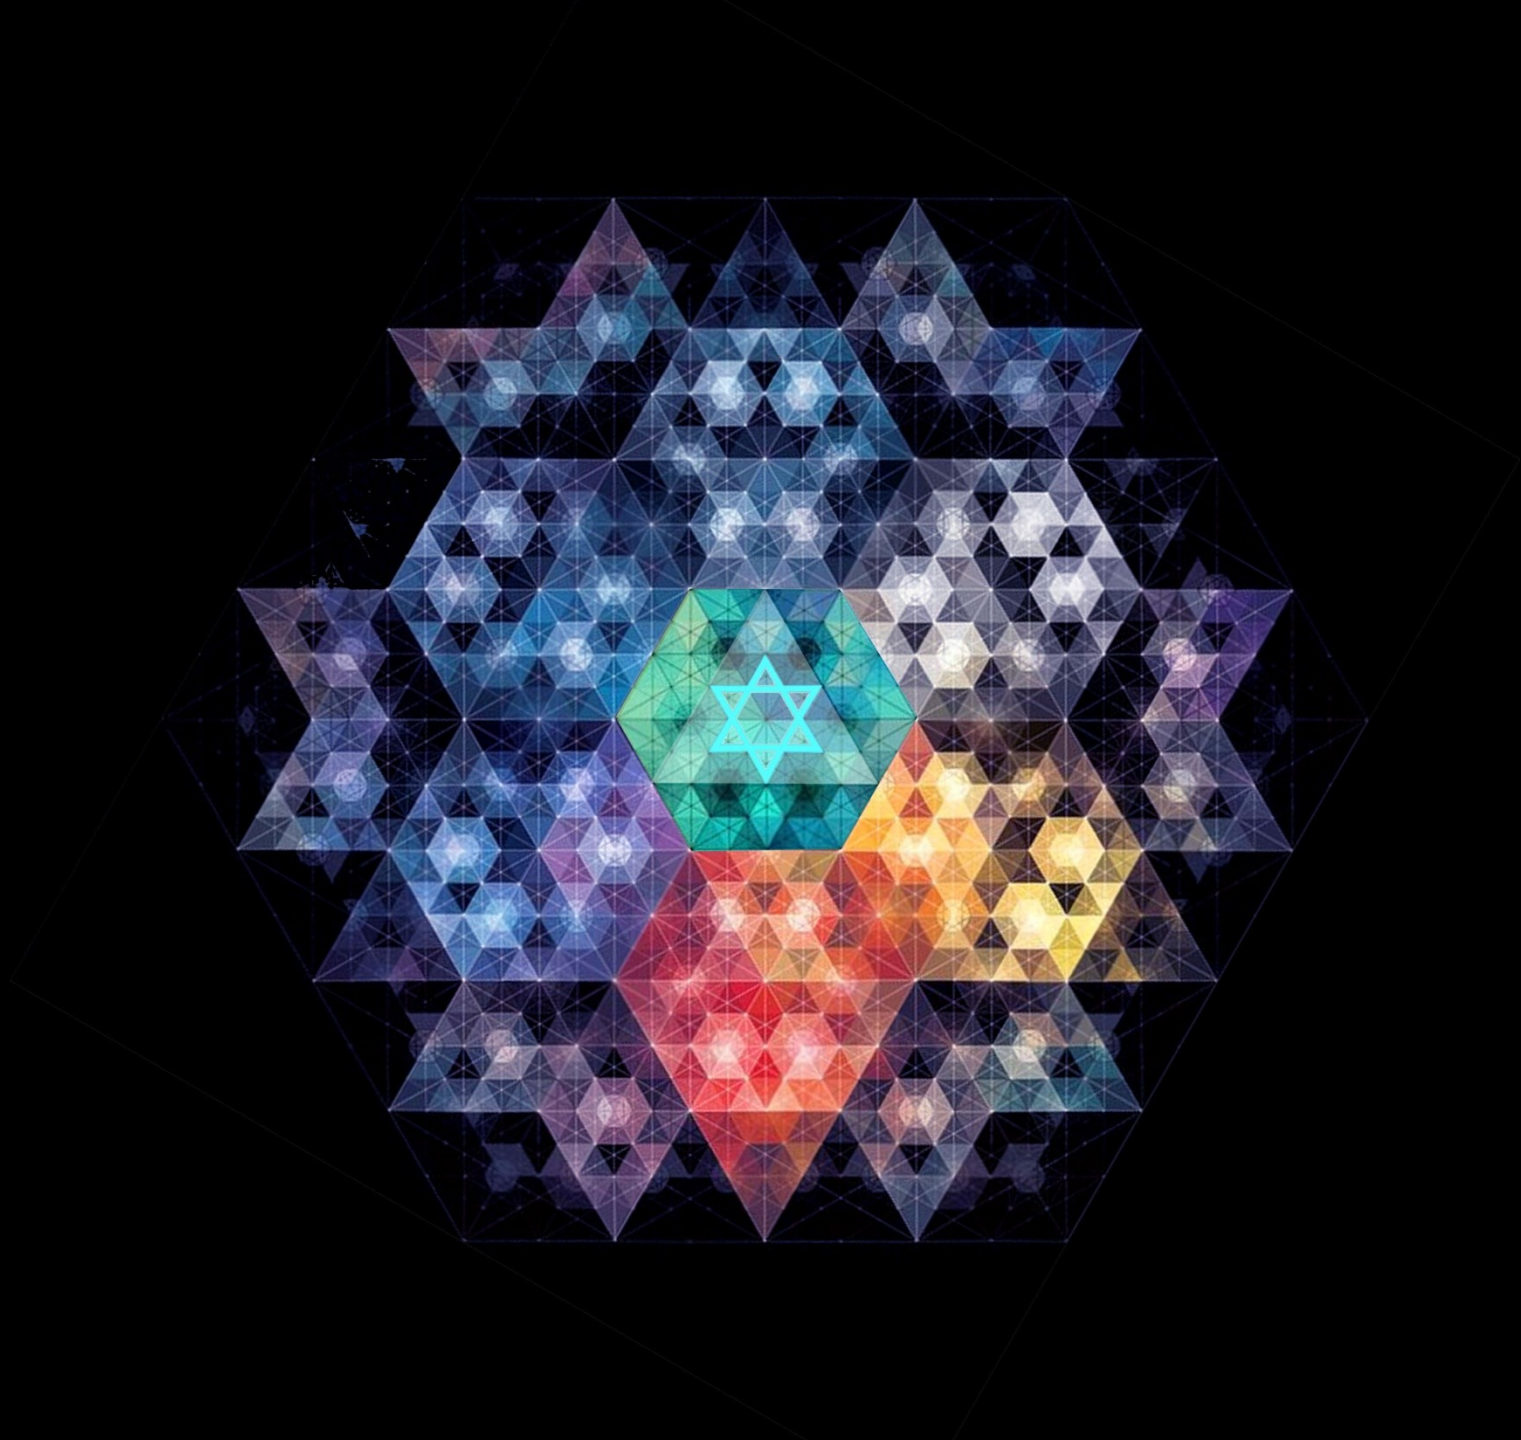

A living flaming iridescent globe of pure fire, and holding within it a certain geometrical shape

“At the culmination of life experience, and when man has reached his goal, each triangle is a radiant path of fire, and each centre a wheel of living fiery force rotating at terrific speed; the centre at this stage not only rotates in a specific direction, but literally turns upon itself, forming a living flaming iridescent globe of pure fire, and holding within it a certain geometrical shape, yet withal vibrating so rapidly that the eye can scarcely follow it. Above all, at the top of the head will be seen a fiery display that seems to put all the other centres into insignificance; from the heart of this many-petalled lotus issues a flame of fire with the basic hue of a man's ray. This flame mounts upward and seems to attract downward a sheet of electric light, which is the downflow from the spirit on the highest plane. This marks the blending of the fires and the deliverance of man from the trammels of matter.” (A Treatise on Cosmic Fire (169-171))

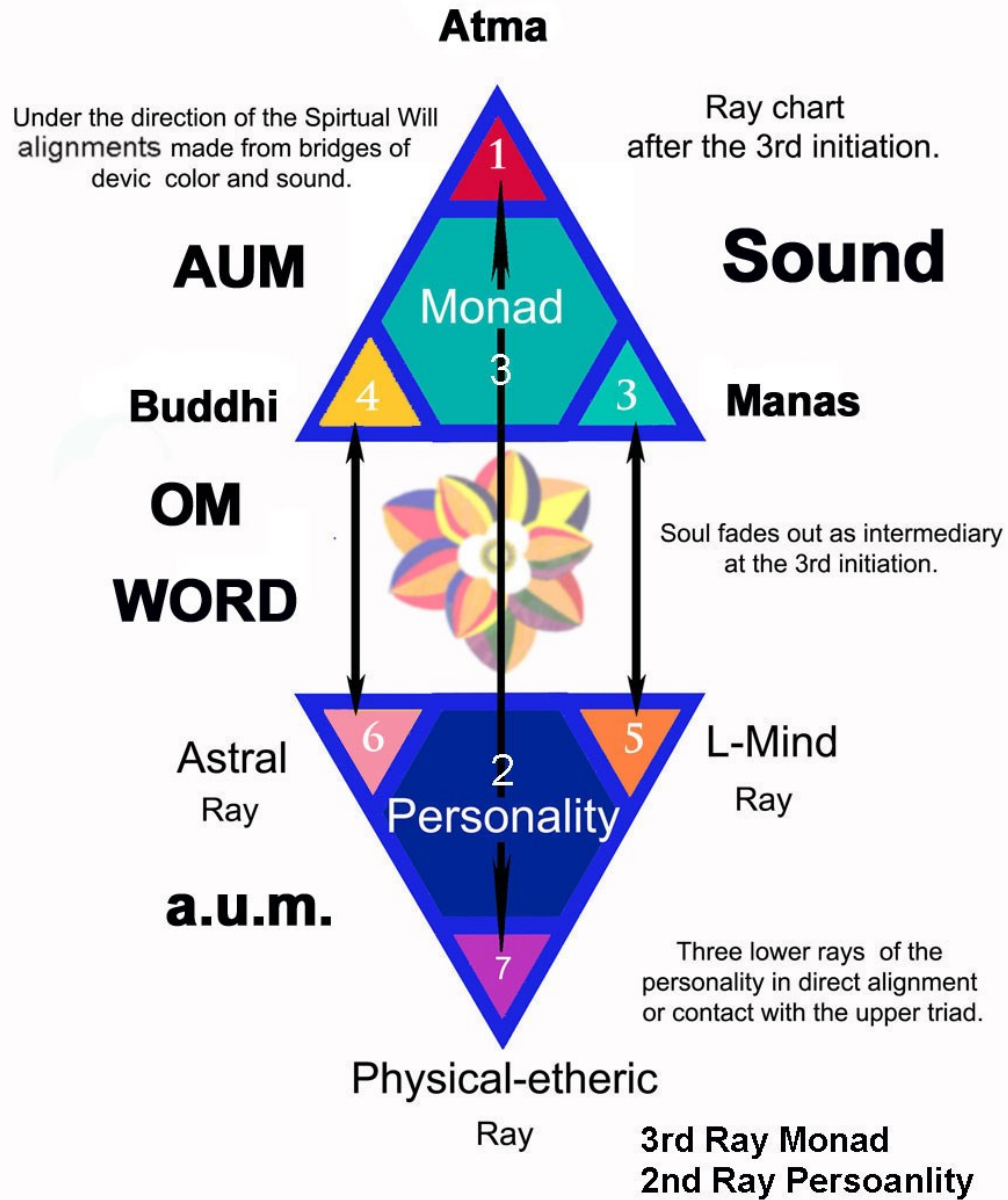

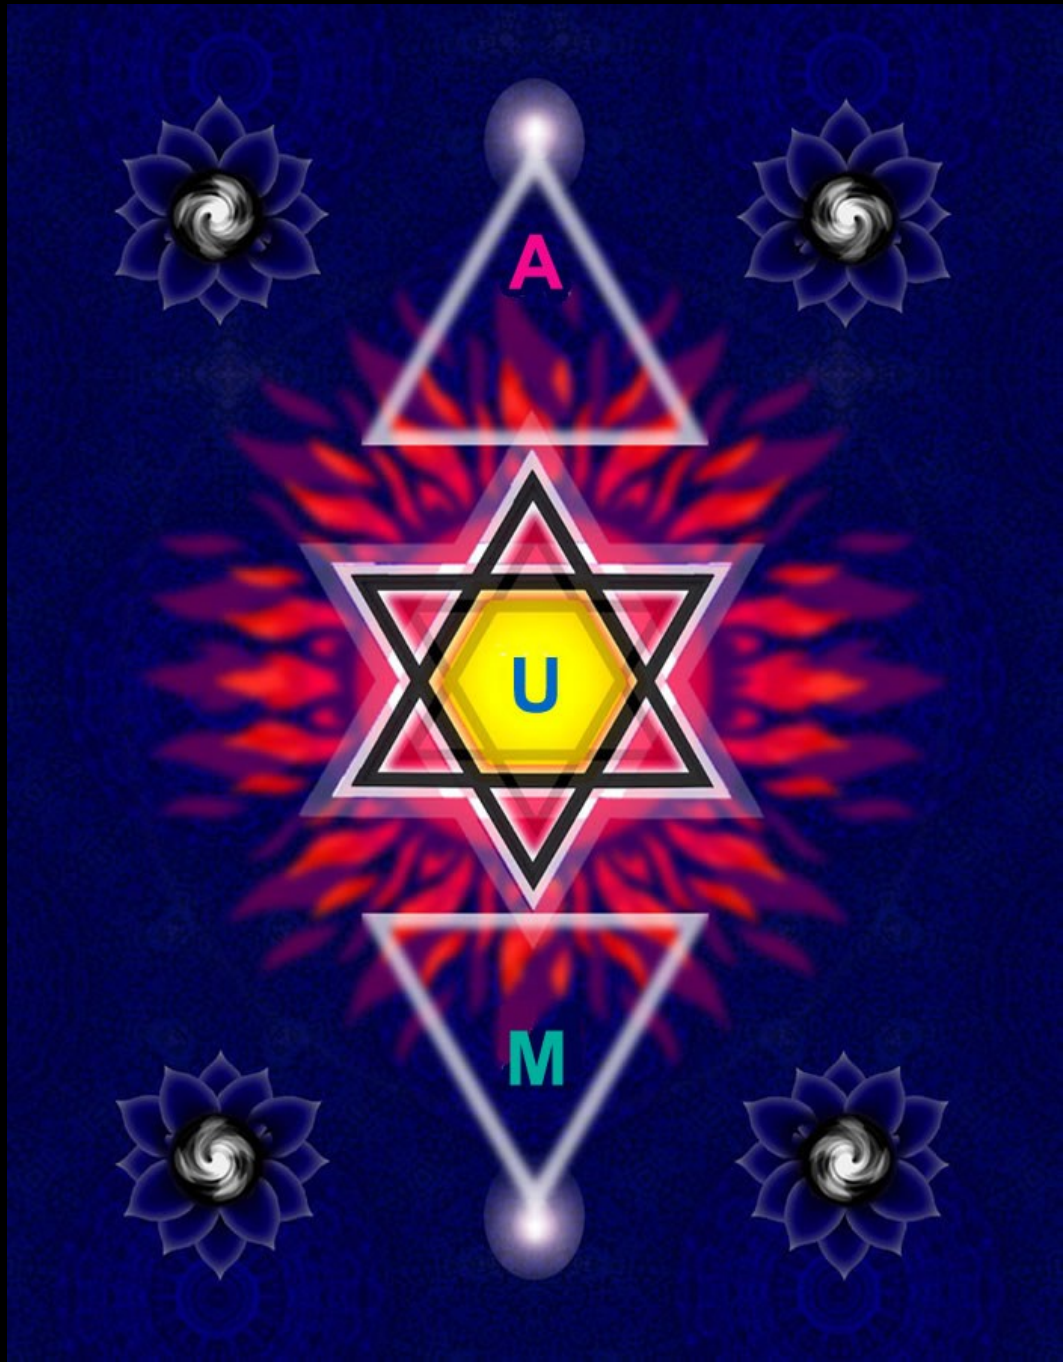

Section 4

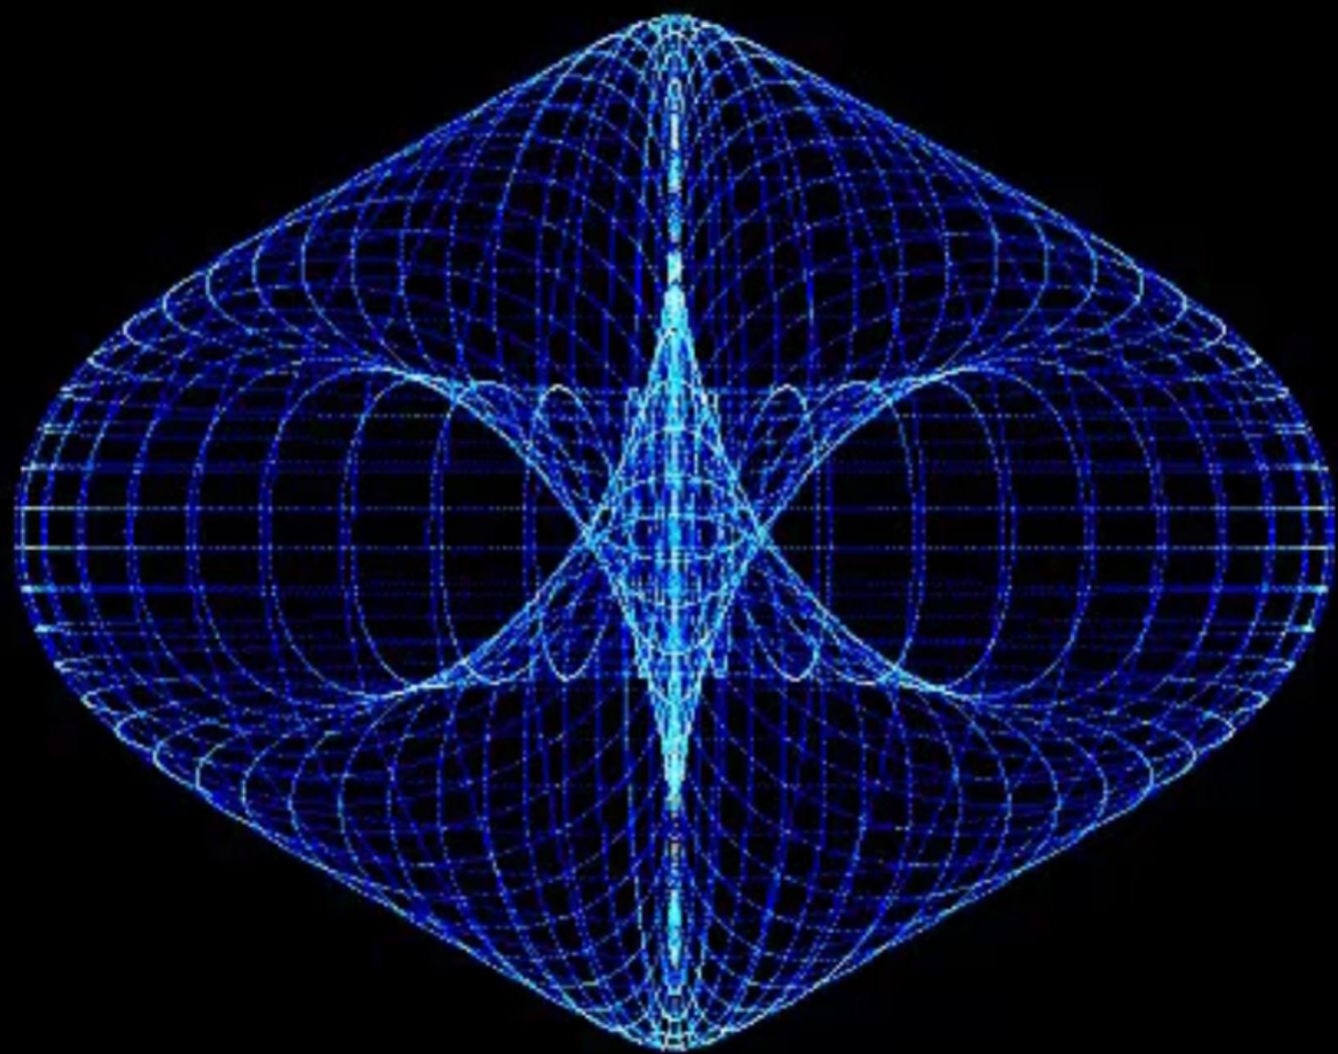

The 3 notes and the 3 demands

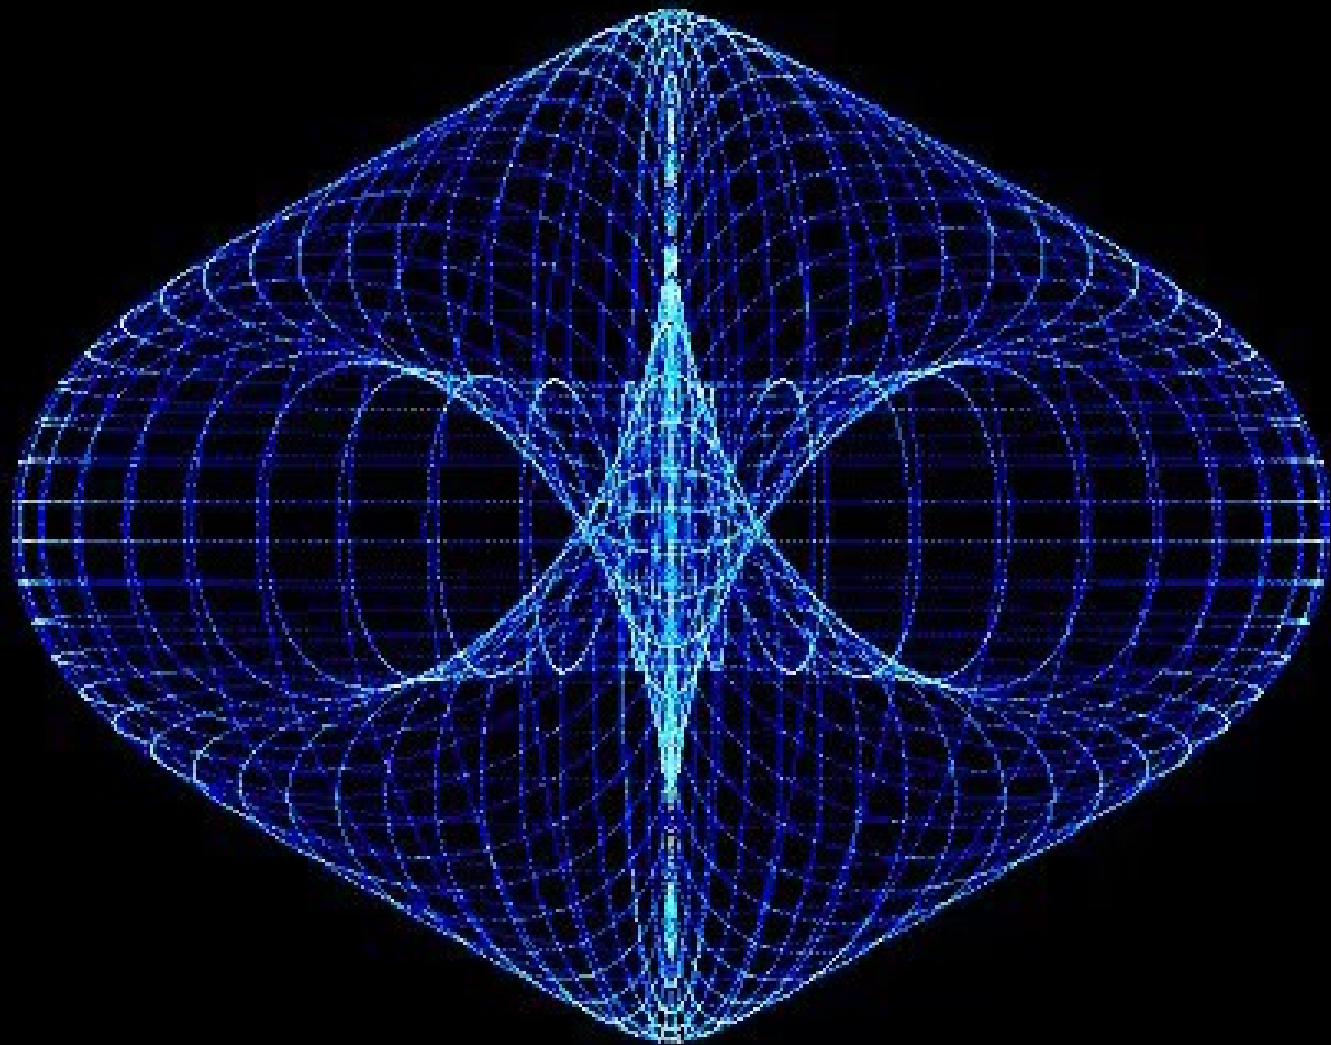

“What I am doing in these instructions is to indicate the relation between the threefold personality and the Spiritual Triad, linked and brought together by the antahkarana. Each of these three lower aspects has its own note and it is these notes which produce the sounding forth of the three demands which evoke response from the Spiritual Triad and thus reach the Monad in its high place of waiting in Shamballa.” (RI p62)

MONAD

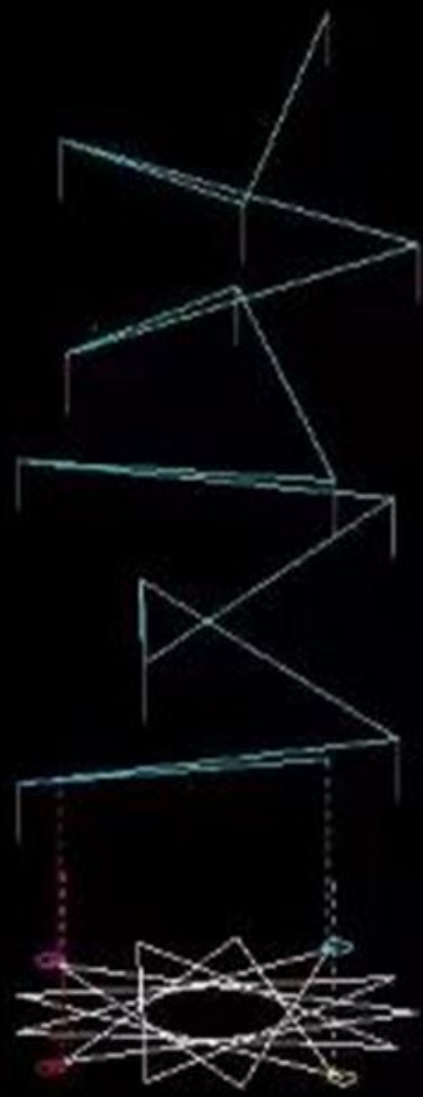

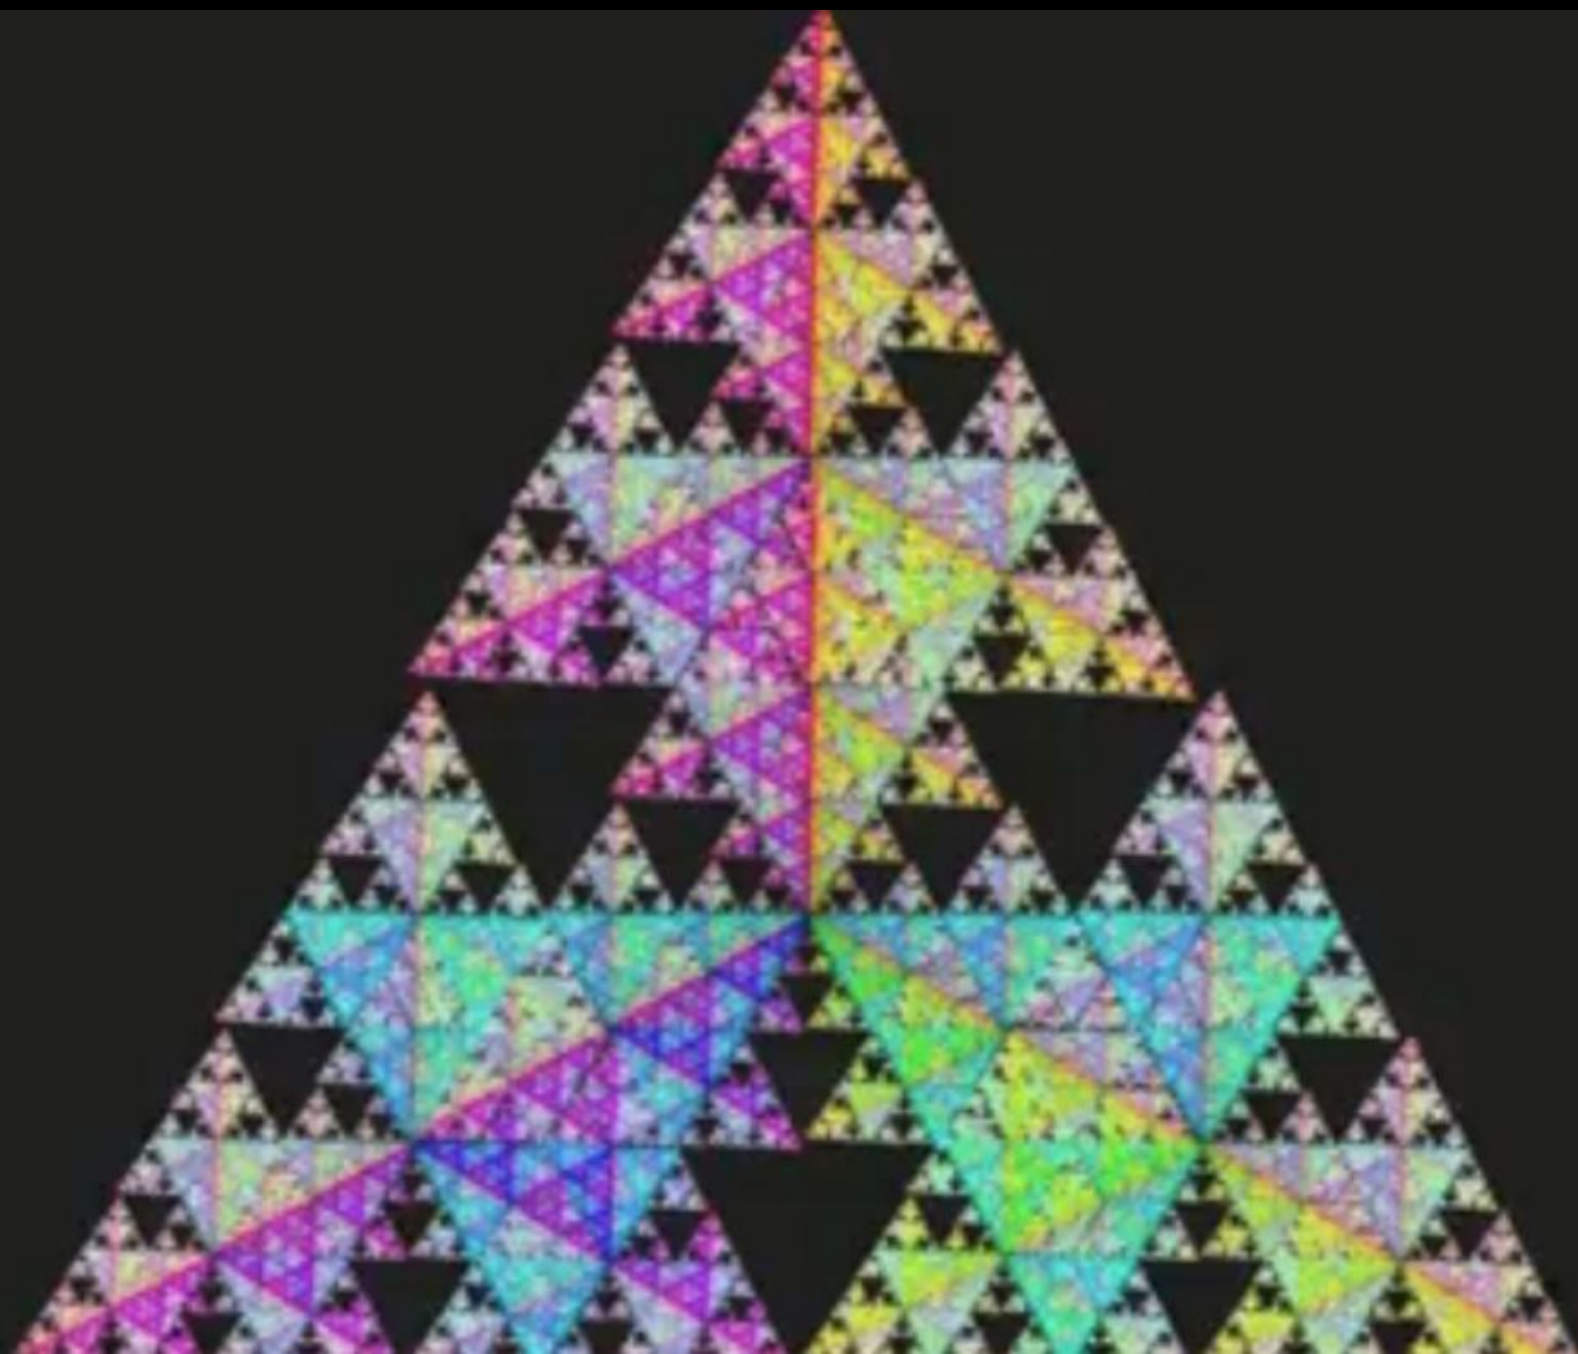

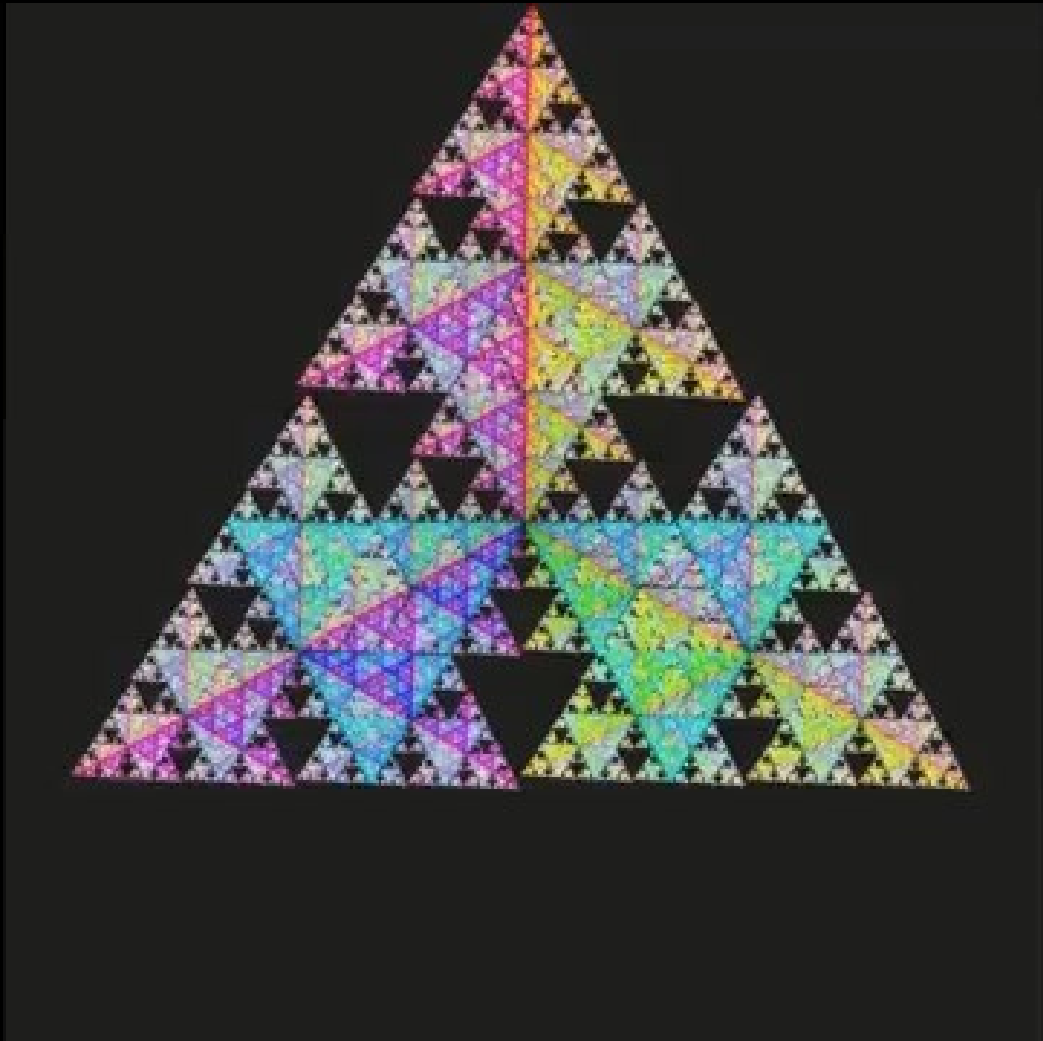

Triangles Triple in Nature

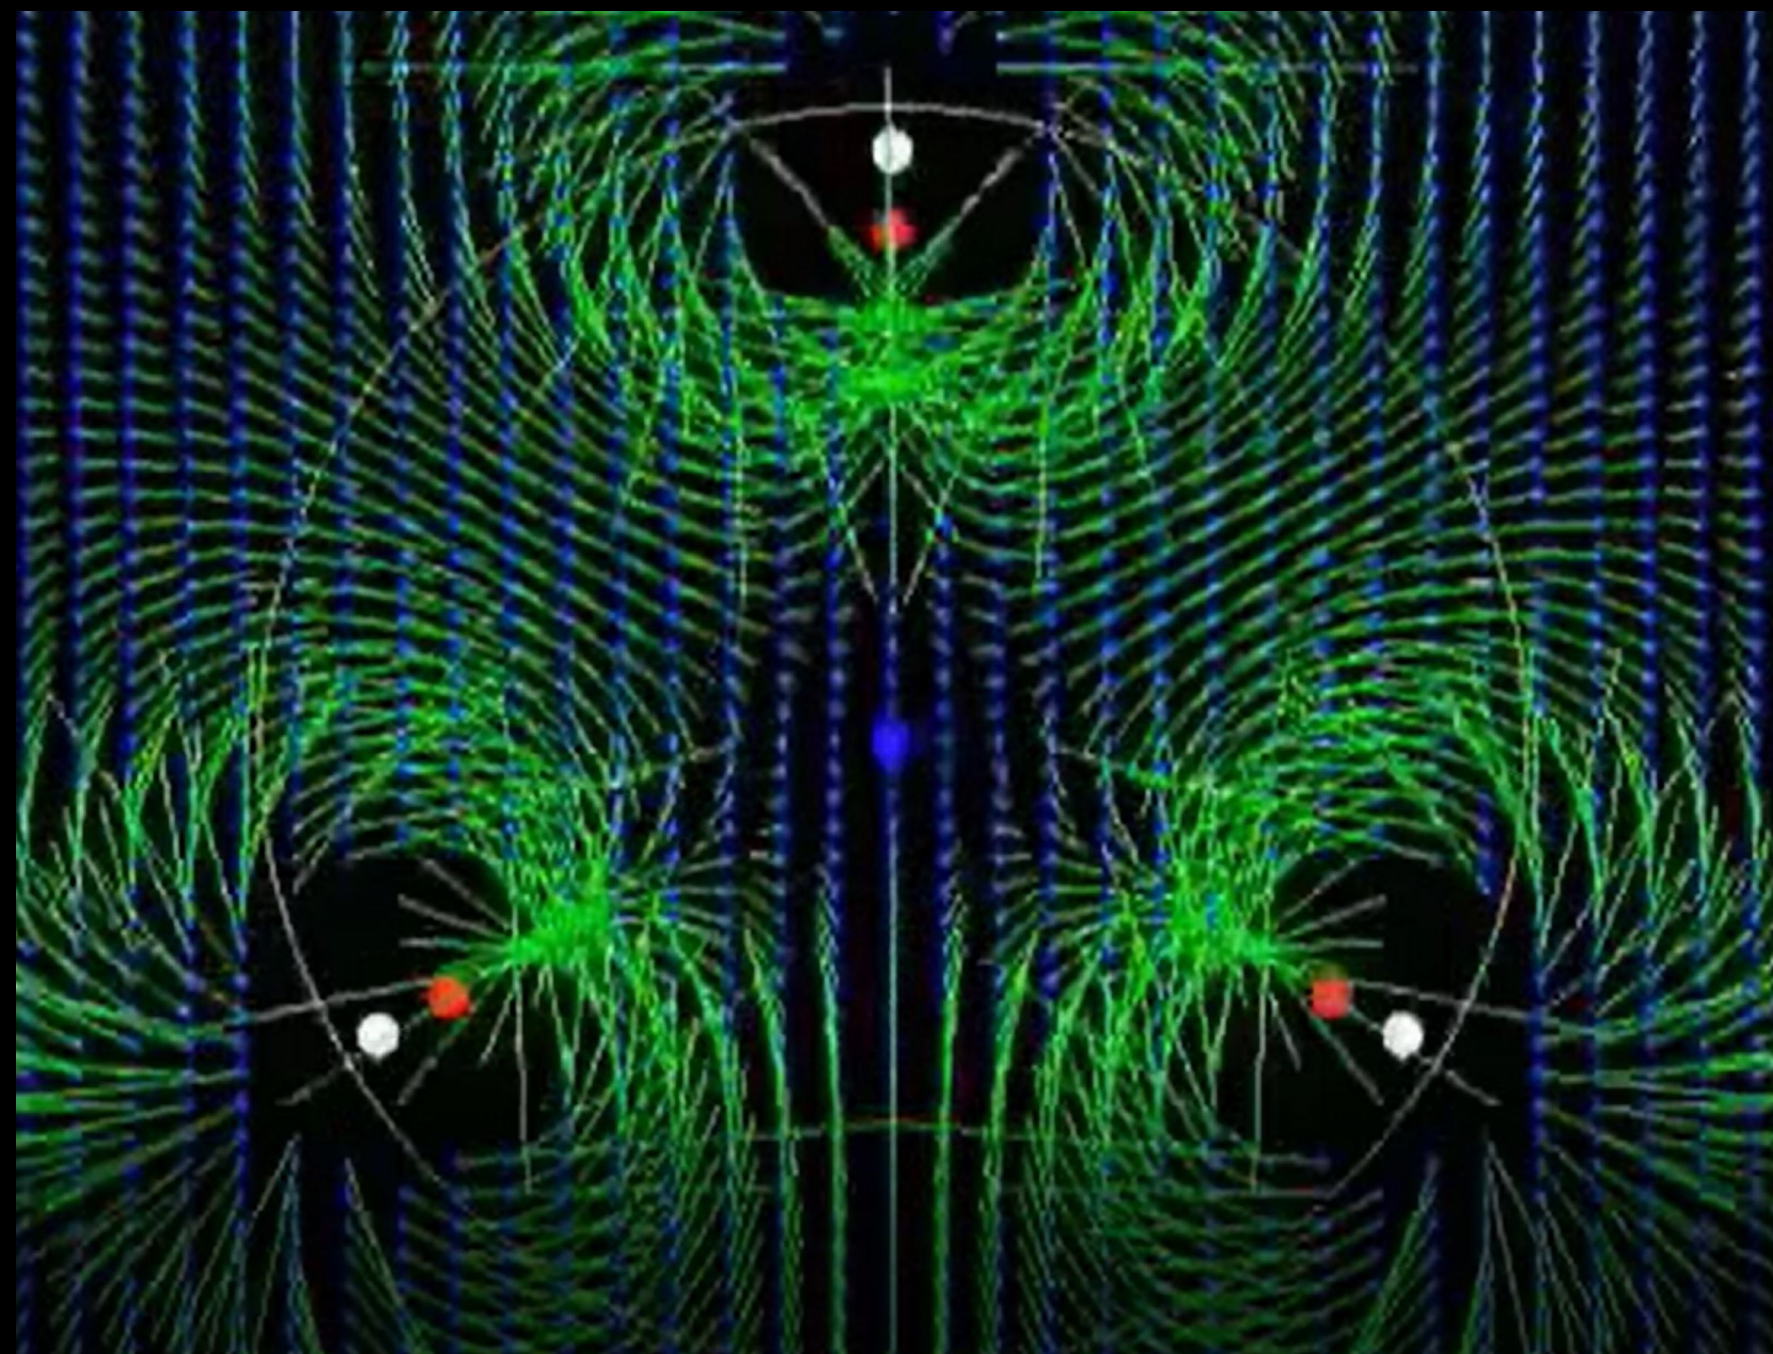

“I wonder if you can grasp at least partially and symbolically the fact that these triangles must not be thought of as placed, static and eternally the same, or even as three dimensional. They must be regarded as in rapid movement, revolving eternally in space and ceaselessly moving onward and as of fourth and fifth dimensional extension. There is no way of depicting them or of bringing them visually to your attention, for only the inner eye of vision can imagine their progression, position or appearance... Therefore the entire cosmic web and solar system is an intricate, constantly moving, interwoven series of triangles wherein each point of a triangle emanates three lines or streams of energy (nine in all); it is likewise responsive to and receptive of the energies—likewise triple in nature—which lie within its periphery or sphere of influence and vibratory activity.” (Esoteric Astrology 418)

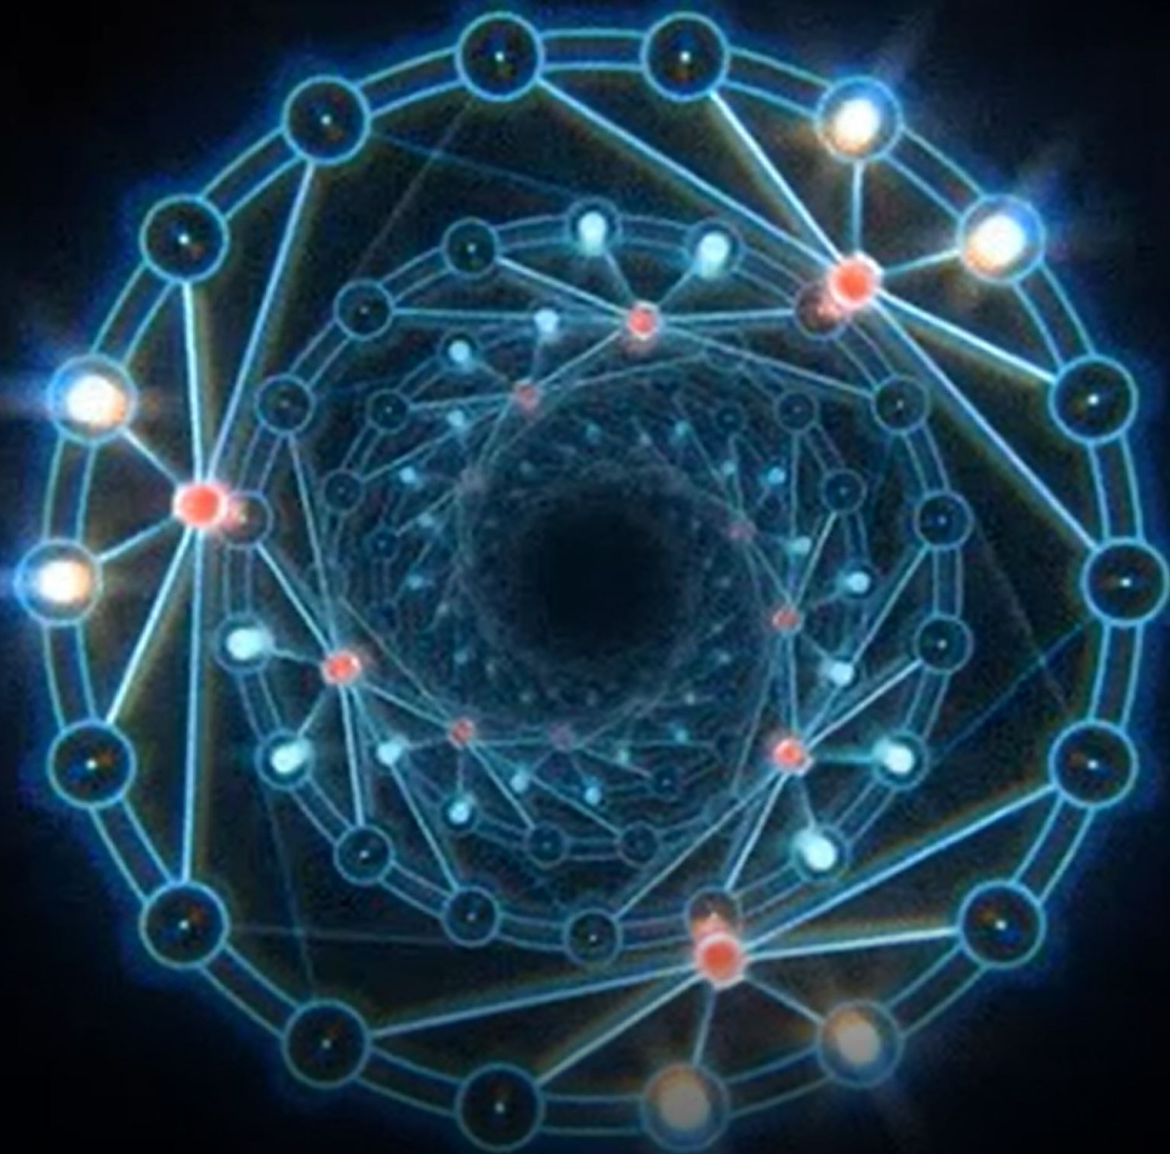

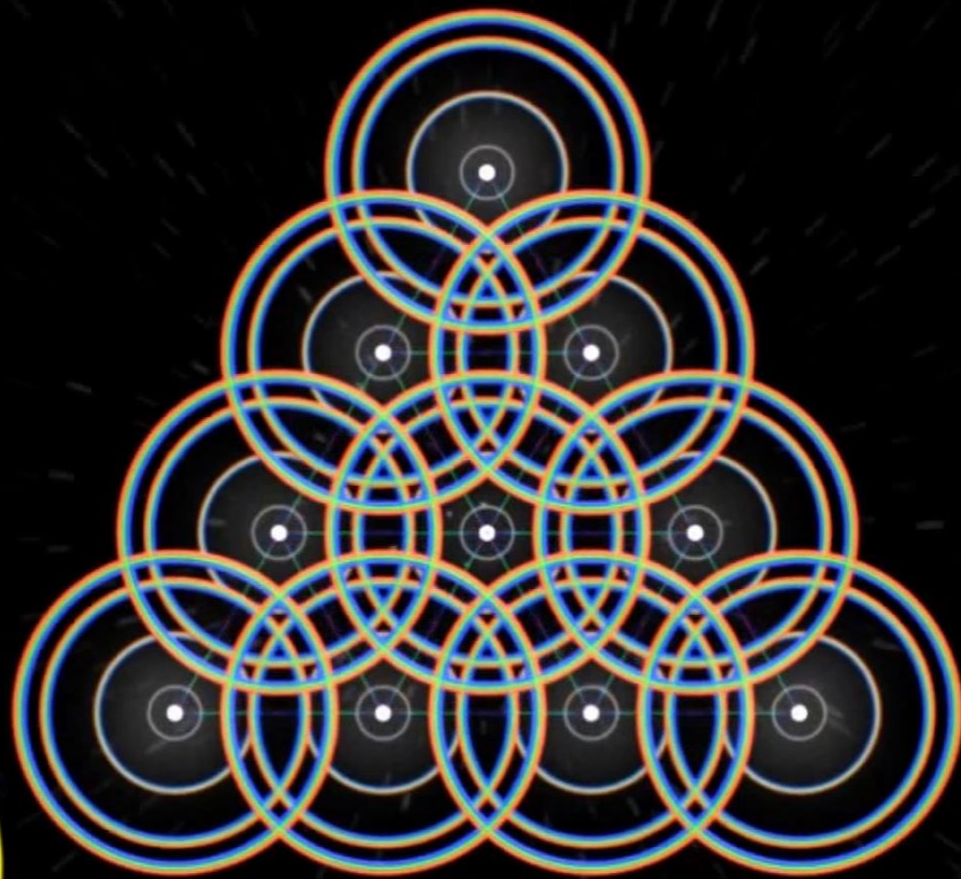

Properly Striated Mental Body

**“When a man starts out to follow the path of occult meditation, it takes well-nigh fourteen years to rebuild the subtle bodies, and incidentally the physical. All through that period it is not safe to tamper with the unknown for only the very strong refined physical body, the controlled stable and equalised emotional body and the properly striated mental body can enter into the subtler planes and literally work with Fohat, for that is what the occult does.”
(LOM 131)**

Circulating their light from point to point of a rapidly moving triangle

“By the time the third Initiation is reached, a wondrous transformation has transpired. The outer sphere is palpitating with every colour in the rainbow, and is of wide radius; the streams of electrical energy circulating in it are so powerful that they are escaping beyond the periphery of the circle, resembling the rays of the sun. The nine petals are fully unfolded, forming a gracious setting for the central jewel, and their orange hue is now of a gorgeous translucence, shot with many colours, that of the egoic ray predominating. The triangle at the base is now quickened and scintillating, and the three points are small blazing fires, showing to the eye of the clairvoyant as sevenfold whorls of light, circulating their light from point to point of a rapidly moving triangle.”(764 TCF)

THE TURNING OF THE WHEEL

(The greater and the lesser)

“The one wheel turns. One turn alone is made, and every sphere, and suns of all degrees, follow its course. The night of time is lost in it, and kalpas measure less than seconds in the little day of man.

Ten million million kalpas pass, and twice ten million million Brahmīc cycles and yet one hour of cosmic time is not completed.

Within the wheel, forming that wheel, are all the lesser wheels from the first to the tenth dimension. These in their cyclic turn hold in their spheres of force other and lesser wheels. Wheels within wheels, spheres within spheres” (TCF 1085)
