

Full Moon Technique of Approach

Step 1

- Link in group Love; raise to highest mind and hold in the Light.
-

Step 2

- Visualize Master in a disk or sphere of indigo blue, a deep electric blue, pouring out love and strength and lifting you higher.
-

Step 3

- Visualize path of golden light between group and Master. See this gradually shorten, bringing the group into the heart of blue disk. [pause and register heartfelt intent.]
-

Step 4

- Visualize group standing before a golden or ivory door. See the door slowly open, revealing a long low room with three windows— one looking east, (gold) one looking west (blue), one looking north. (green)
-

Step 5

- Seated before the eastern window, with his back to the window, visualize your Master in meditation, seeking to contact you.
-

Step 6

- Picture the group advancing slowly up the long room, standing before him. Each as spokesman offers the group in service and consecration to the Plan.
-

Step 7

- Imagine the Master rises, and as a group we face the East and say together the Great Invocation. Listen with care and concentrate to consciously *follow His lead* as we say the words. [pause and distribute]
-

Step 8

- As we you stand before the "open window", imagine yourselves bathed in a vivid butter-coloured living light pouring through the window and enveloping the group.
-

Step 9

- Now attempt to hear me speak the words and image which He may have for you. Note, as this happens, which centre responds or registers the vibration and stimulation or any phenomena of any kind.
-

Step 10

- Then stretching out your hands in blessing, say together the formula of Unification.
-

Step 11

- Together in the light from the East, see it pour through the Master to each, entering the head centre, passing to the heart centre, and from the heart, send to the dim light in the solar plexus.
-

Step 12

- Then, withdrawing again to the head centre, see the three centres (head, heart and solar plexus) linked so all members are thinking as one, and loving as one.

Your aspiration will then surge upwards as one spontaneous movement.

[register, pause, distribute, and release.]

Note

- This will in due time create a magnetic field of light and life, within which the New Group of World Servers will live, mature and come to fruition. Keep the whole process, my brother, very simple and uncomplicated in your mind. If you will follow the above instructions with the simplicity of a little child, you will bring about a situation wherein work will be possible. Look not for results. Yours is to do the outlined work and when rightly done, this makes the result inevitable...
-
